

The background of the top half of the page is a photograph of a large-scale construction project. A tall yellow tower crane stands prominently on the left, its arm extending over a building under construction. The building is heavily encased in a complex network of steel reinforcement bars (rebar) and green safety netting. In the foreground, the arm of a red excavator is visible, positioned over a pile of reddish-brown earth. The sky is a mix of blue and soft, hazy clouds, suggesting a dawn or dusk setting. An orange rectangular box is partially visible on the left edge of the image.

IMPROVING

Construction Business
Performance in the
Southeast

AN ASSOCIATION WITH **ALL PERSPECTIVES**

The Southeastern Construction Owners and Associates Roundtable (SCOAR) builds relationships between owners and all other industry participants. The objective of SCOAR is to continuous improvement of Safety, Quality, and Cost in construction projects.

FOR OWNERS

Owners value the opportunity to efficiently network with multiple Owners, EPC contractors and engineering firms and vendors at a single event, as compared to meeting them individually while back in the home office.

FOR CONTRACTORS

Contractors can gain visibility in the industry and share and learn best practices on safety, operations, technology, workforce development, quality, and business

FOR SUPPLIERS & VENDORS

For suppliers and vendors, SCOAR is an excellent opportunity to engage and network with owners, contractors, and other suppliers and vendors.

FOR ACADEMIC INSTITUTIONS

For academic institutions, career and technical education (CTE) programs and workforce development programs, SCOAR offers a forum to engage directly with industry and stay current with industry trends, information and practices. In addition, academic members engage with industry for support, scholarships, internships, job placement and research.

COMMITTED TO IMPROVEMENT

SCOAR provides a forum for the exchange of information, views, practices, and policies of its various members in the southeast. SCOAR is the ideal size organization for in-depth dialog, and engagement with all industry segments. Our cost structure and allows for inclusion of companies of all sizes. SCOAR continues to drive for member company improvement by:

- Improving overall cost effectiveness
- Advancing the latest technologies
- Improving construction planning, management, and execution
- Improving the motivation, training and supervision of industry professionals including skilled trades, engineers, and managers
- Improving relationships between owners, engineers, and contractors
- Hosting meetings and an Annual Conference to share information, trends, and provide networking opportunities.

SCOAR'S FOCUS

- To help you improve safety, quality and cost effectiveness in your company's construction and maintenance projects.
- To provide and strengthen the "member's voice" within the industry and to give members direct involvement in regional construction issues.
- To provide a resource for sharing best practices among users and providers of construction.
- To provide a forum to address mutual issues especially safety, labor relations, productivity improvement, technology, and other cost reduction strategies.
- To provide an opportunity for members to network on state, and regional issues.
- To promote workforce education and training as well as effective construction planning and practices. To collectively communicate and interact to assure that the owner and associate members voices are heard and understood.
- To create and improve positive, cooperative relationships with the construction industry workforce.
- To provide members with valuable information developed on a national level concerning legislation, safety, training, worker qualifications, and technology.
